EDUCATION

San Francisco State University, CA
Bachelor of Computer Engineering

September 2024 - May 2028
GPA: 3.85

EXPERIENCE

Freelancing — *Frontend Developer*

February 2022 - PRESENT

- Built and shipped 50+ production React pages used by real clients.
- Worked with designers and backend developers to deliver features end-to-end.
- Owned features from UI implementation to API integration.

PROJECTS

Expenses Tracker

tracker.karam.page – github.com/karambarakat/MoneyTracker

A full-stack CRUD application is written in React, Rust, and SQL. It has email/google authentication, CI/CD pipeline, end-to-end testing, Terraform, and more.

Open-source CMS in Rust.

github.com/Karam2B/linked-ql – crates.io/crates/linked-ql

I maintain an open-source content-management-system CMS that focuses on performance and customizability.

Todo App

doiter.karam.page – github.com/karambarakat/doiter

A lightweight task management application focused on simplicity and offline ownership of data.
